SUMMARY

Bilingual (Spanish, English) and results-driven Technical Lead with extensive experience in forming and driving high-performing technical teams, and a deep understanding of multiple technologies to deliver complex digital products on time and within budget consistently. Committed to fostering a culture of continuous improvement, meeting challenging goals, and nurturing talent to its full potential. European Union citizen, holder of a Spanish passport, willing to relocate within Europe.

PROFESSIONAL EXPERIENCE

SmartVoting SpA [https://www.smartvoting.cl] — Braga, Portugal
Chief Technical Officer (Remote) — March 2022 – Present

SmartVoting is a Chilean startup offering B2B2C SaaS e-voting services.

- **Team**: Remote - 5 Software Developers, 1 UI/UX Designer, and 1 SCRUM Master.
- **Technologies**: AWS, Linux, Python, PHP/Symfony, Node.js, PostgreSQL, MySQL, React, Vue, SCRUM, PMI.
- Recruited, developed, and mentored the remote technical team.
- Managed the entire lifecycle of the new e-voting platform, from design to deployment.
- Launched the new platform in July 2022, serving more than 35,000 voters with a 100% system availability rate.
- Developed both the Product Roadmap and Technology Roadmap for 2024.

Vacasa SpA [https://www.vacasa.com/] — Santiago, Chile
Engineering Team Lead (Hybrid) — January 2021 - January 2022

US company offering B2C & B2B SaaS vacation rental unit management and marketing (Hospitality).

- **Team**: Remote - 6 SW Developers, 1 QA Tester, and 1 UI/UX Designer.
- **Technologies**: AWS, Linux, Event Sourcing, Node.js, Python, PHP/Laravel, PostgreSQL, React, SCRUM
- Designed REST APIs, event-sourcing, and serverless architectures based on the AWS platform.
- Led the migration from a PHP-based monolith to microservices using Javascript/Python.
- Successfully reduced same-day reservation errors related to timezones from 18% to less than 1%.

Option SpA [https://option.cl/] — Santiago, Chile
Advanced Analytics Head (Remote) — August 2019 - January 2021

Chilean consulting company offering digital acceleration & outsourcing services to retail and financial customers.

- **Team**: Onsite/Hybrid/Remote - Up to 26 Data Engineers, 5 Data Scientists.
- **Technologies**: GCP, Azure, Python, DataFlow, Airflow, TensorFlow, PowerBI, SuperQuery, SCRUM, Kanban.
- Led multiple projects involving Machine Learning, Business Intelligence, and Data Governance.
- Spearheaded talent acquisition and development initiatives.
- Coordinated SCRUM ceremonies and actively participated in Design Thinking sessions.
- Created business cases and project proposals for clients.

TransUnion Colombia [https://www.transunion.co/] — Bogotá, Colombia
Software Development Manager (On-site) — May 2018 - December 2018

Branch of a US company offering B2B credit risk control, data analytics, anti-fraud, and KYC services to financial, insurance, retail companies, and government organizations.

- **Team**: On-site - Up to 50+ SW Developers, 4 Team Leads, and 6 Data Analysts.
- **Technologies**: OnPremise, Linux, Windows, AWS, Java J2EE, Oracle, SAS, SCRUM, PMI.
- Re-structured the team around agile practices improving performance.
- Defined demand management procedures and prioritized initiatives with positive outcomes:
    - Reduced the age of the oldest software requirement ticket from over 2 years to 6 months within the first 5 months.
    - Downgraded the highest priority open incident ticket from Critical to Low within 3 months.
    - Eliminated the risk of high penalty fees associated with non-compliance with personal data protection laws.

TransUnion Chile [https://chile.transunion.com/chile] Santiago, Chile
Regional IT Plan Manager, LATAM (On-site) January 2017 - April 2018

Regional-scope project to lead the initiative to unify the technical platform of TransUnion business units in Latin America and to align the technology with the overall regional business strategy and the global technical strategy.

- **Team**: 4 System Architects distributed in the Dominican Republic, Colombia, Chile, and Guatemala.
- **Technologies**: AWS, Node.js, PostgreSQL, SCRUM, PMI, SAFe.
- Defined the Technological Evolution and Convergence Strategy Roadmap for LATAM.
- Project manager for LATAM regional projects, reporting to the International Project Management Office.

TransUnion Chile [https://chile.transunion.com/chile] Santiago, Chile
IT & Operations Manager (On-site) August 2013 - December 2016
