The Challenge

Fractional CTO Services

How do we achieve it?

An improvement over alternative solutions

Feasibility

Business model

It's not just a CTO...

Thanks

Motivation

Technology can be a powerful driver for the creation of a startup or the efficient operation of small and medium-sized enterprises... However, in many cases, the lack of IT skills or experience hinders reaching the full potential that technology can offer.

The Challenge

+ Chief Technology Officer =

With so many options and technical roles, the situation can be confusing...

But with a bit of specialized help.

You can achieve your goals.

Pablo J. Mogollón Somavilla

Fractional **CTO** Services

Through the part-time services of a CTO, a company or startup can leverage technology to initiate and enhance its operations without having to permanently hire a profile that, due to its experience, may represent a cost beyond their reach.

Alguns dos cenários em que um CTO pode ajudar são:

An entrepreneur needs to develop an app and doesn't know where to start.

A small company needs to have a technology team, but the costs are very high.

A company has established itself in the market and discovers that to remain competitive, it must digitalize further.

Technology projects are not being delivered on time, within budget, or with the expected quality.

How do we achieve it?

Technical Team

We help you create and develop a technology team that fits your needs.

Technical Services

We develop applications and MVPs in record time, minimizing costs, and maximizing quality.

Digitalization

We guide you in the digitalization of operational processes and coordinate the implementation to ensure operational efficiency.

An improvement over alternative solutions

Specialized Software

There is specialized software for each of your needs. However, it's necessary to select the most appropriate one, integrate it with other programs, and adapt your operation to fit the software... Shouldn't it be the other way around?

Traditional Consultants

Traditional consulting firms have procedures and cost structures that may not necessarily adapt to the situation of a startup or small and medium-sized enterprises.

Internal Team

Organizing an internal team can be an excessive burden that can sink a growing business. It's often better to find an appropriate combination of internal staff, contractors, and services that provide an effective, dynamic operating force with controlled costs.

Feasibility

Market

The European Union has a dynamic ecosystem of startups and SMEs.

25.73M
Number of SMEs

32k
New Startups (last 5 years)

6%
Failed due to technology.

100%
They need IT in their operation.

Potential Value

Assuming conservative rates of CTO service demand in extreme cases (6%).

24h
Annual consultant hours usage.

95EUR
Hourly rate.

1.55M
Target companies.

3.53B
Estimated market value.

Business model

Relationship	Service provided	Result obtained
Hourly subscription without commitment.	Number of monthly consulting hours with exclusive dedication from the CTO.	➢ Development of a strategic technology plan and project roadmap. ➢ Definition of the most appropriate IT structure and system architecture. ➢ Resolution of specific IT questions.
Project Management	Management and monitoring of: ➢ Software and MVP development ➢ Technical team hiring ➢ Security testing (Pentesting) ➢ Other complex projects and tasks ➢ Vendor relationships	Operational and revenue improvements upon completing projects and achieving desired results.
Courses & Workshops	Team training.	Improvements on operational and compliance with industry policies and regulations.

It's not just a CTO...

Throughout my career, I have had the opportunity to meet and collaborate with top professionals, and that's why I have a network of contacts and allies who support me in expanding my capacity for management and resolving specific issues.
